May 25, 1988

Mr. Glade Berry  
690 East 200 South  
Lehi, UT 84043

Dear Mr. Berry:

Re: Old Mayflower Mine Complex, S/049/013, Utah County, Utah

Thank you for the notice of intent to mine received May 20, 1988. Approval from the Division of Oil, Gas and Mining is not required for less than five acres of disturbance unless a variance from reclamation is requested. We will require that you provide a more detailed description of the reclamation of the site. The enclosed Small Mine Notice of Intention can be used for this purpose or a letter addressing the same reclamation practices is also acceptable.

Any leaching of ore with cyanide, thio-urea, acid solutions, etc. requires approval by the state Bureau of Water Pollution Control. If you have not already obtained a permit from them, I recommend that you contact Mr. Charlie Dietz at 538-6146.

I have enclosed a copy of a list of permits required to mine in the state of Utah for your future use. Most of the permits are not pertinent to your current operation.

Please contact me or Holland Shepherd of this office if you have any questions or need additional information. The Division's approach to reclamation in old mining districts is weighted heavily towards safety concerns. Roads, buildings or other structures which have other uses after mining is concluded do not have to be removed.

Thank you for your cooperation. Please refer to file S/049/013 in any future correspondence.

Sincerely,

A handwritten signature in dark ink, appearing to read "Frank J. Filas", written over a horizontal line.

Frank J. Filas  
Reclamation Engineer
